Projects

○ The Curl Nation | iOS Application

Role: iOS Developer, Team lead.

Duration: 2.5 Months (Live)

Description: The Curl Nation, is a one-stop destination for all curly hair needs! As a one-of-its-kind of its store, based in Kuwait, The Curl Nation has the biggest collection of wavy, curly, coily hair products from best-selling international brands across the globe. We have made an e-commerce app with payment gateway integration including Apple pay. Some of the major modules of the app are listed below.

- Customized Dashboard with multiple banners and different layouts.
- Celebrity Section with their preferred product list.
- User authentication with social login (Google, Facebook, Apple Login)
- Video Section with product recommendation.
- Local Database management using SQLite.swift
- Multiple currency options
- Multi-language Implementation.

○ OpenSlot - USER & OpenSlot-Partner | iOS Application

Role: iOS Developer, Team lead.

Duration: 4 Months (Completed - ON Hold)

Description: OpenSlot, is one of the best solutions for spa & salon service providers. This is a platform for such businesses and individual service providers to list their services and manage all their bookings via this portal. Users can book these services via this app as well as they can purchase branded and quality products suggested or recommended by their preferred spas & salons. Major app modules are listed below.

- Business Module.
- Product Module.
- Artist Module.
- Multiple service Booking.
- Loyalty program.
- Product Checkout with multiple payment options such as knet, Visa/Master & apple pay.
- Subscription & package purchase for businesses.

Projects

○ The Wishlist – V2 | iOS Application

Role: iOS Developer.

Duration: 5 Weeks (Live)

Description: This was the major application upgrade of our client project. The complete application was Re-Design with a new look and feel, worked coordinately with our senior developers and completed major modules like Product listing to Checkout, Manage Orders and many more.

○ Fashionzat | iOS Application

Role: iOS Developer.

Duration: 2 Months (Live)

Description: This is the platform for photographers, makeup artist videography service providers. Here such artists and service providers list their services which can be booked by the user and make payment for the same. This was the 1st commercial application officially I have worked on. Worked on major modules & some are listed Below:

- Appointment Booking with a particular service.
- Add artist to favourite list.
- Multiple language integration.
- Social login integration like Facebook, Google, and Apple login.

○ Salamtek | iOS Application
